EXCEPTIONAL MATERIALS	23
CERTIFICATES	24

Thanks to the modern way of production and the use of high quality raw materials from renowned world companies we are able to offer you mattresses with different properties and characteristics. It should also be taken into account for years, sex, health, weight, body temperature, sweating, etc. We advise you to always try the mattress before buying.

Pay attention for a few things to the mattress with bonnell spring core, pocket core, latex or memory foam.

Each of these materials differs in pressure and provides a different support to your body.

COMFORT - it is achieved with different materials, eg. PU foam, latex or memory foam, and thanks to high-quality fabrics, the mattress becomes even more pleasant.

PLEASURE - the mattress must be so spacious to provide enough space for free movement both for the individual and for partners. Pay attention to the interior dimensions of the bed. All given models of mattress can be made in all standard dimensions and dimensions according to customer's requirements.

Always follow the manufacturer's instructions. Not every mattress is the same.

- Good support: Ensure that your mattress has good, stable support for the entire mattress surface, choosing a quality foundation. If the mattress is placed on a substrate with hard or latoflex strips it is recommended that the maximum distance be 6 cm between the slats. It is mandatory to use two mattresses on the mat for a double bed consisting of two smaller latoflex substrates. The mattress must not bend or break.

- Proper installation: Make sure your new mattress and bed base are positioned appropriately.

- Turning: If the instruction does not specify otherwise, it is necessary to periodically turn your mattress in order to equalize the traces of lying and the mattress equally sprinkled. The mattress should turn in the direction of the head-foot and face-back. Handrails on the mattresses are used for positioning, not to carry a mattress.

- Use a protective blanket or cover: Using a protective blanket or pillow, prolong the life of your mattress and prevent the appearance of dirt, allergens and moisture.

- Ventilation: Ensure that the mattress has the best air circulation by selecting an adequate surface, regular turning and ventilating the room.

- Cleaning: Keep your mattress clean. Do not use bleaches or cleaning products to clean it, as this may damage your mattress. If you are determined to remove stains, use a mild soap with a little cold water and rub it lightly.

About Vapeks company

The Vapeks company from Cacak, **st Radonje Golubovica Goluba no 9, RS**, is for many years a leader in the region in production of all types of foam (Sky cell foam, memory foam, HR foam), and since 2010th year we began production of mattresses.

We can boast a wide assortment and exceptional quality of our products.

Our company consist a team of experts in the field of production technology, organization and logistics, marketing and sales... We collaborate with doctors and physiotherapists the most known health institutions in Serbia and Russia.

Continuously we test and study the impact of our products to reduce problems with the spine, headaches and chronic fatigue. In this way we improve our products, and our customers further improve the quality of life.

S Dream mattress brand is already recognized in Serbia and the region, and more importantly, has ideal ratio of price and quality.

Good image of our product contributes to:

- The only one in the country we have mattresses with MEMO COOL foam. Using this kind of mattress you will see that every part of your body during sleep has adequate support and assistance.

- We offer our customers all types of foam / polyurethane mattress with profiled core and multi-zone effect.

- good market coverage -**S Dream** brand can be found in all major furniture showrooms and "sleep" shops in the whole ex YU, and we are also present in the most demanding European markets such as Germany, Greece, Italy, Switzerland,

Depending on the specific market and the capabilities of our partners we create along with them adjusted assortment with our **S Dream** brand or according to our partners form a private label line.

For us, cooperation does not stop with first order. It only begins at that point and does not stop even when we ensure the best sale and provide a distinctive image in the market.

FOAM MATTRESSES

Foam mattresses are mattresses of new age.

Depending on your need you can choose multiple combinations of composition of the core of foam mattresses. We offer the softest to the hardest, also mattresses with memory foam inserts, HR foam or Eco latex on existing Sky cell foam.

This composition will not allow development of bacteria, mold and mites on your mattress.

MEMO COOL FOAM

The material that has an excellent property that collects less heat than the ordinary mattress with memory foam.

Memo cool has a unique structure that is essential for healthy sleep, combines the unique anatomical support and comfort such as "Seventh Heaven". Memo cool suits for all ages, the body gives orthopedic support and helps preserve health. The top layer of the mattress where the memo cool has a cooling effect, reducing the burden on muscles and helps relaxation, does not work any pressure on the body.

The foam itself has a "memory shape" effect, which guarantees exceptional comfort. Memo cool foam is the new technology of our company, which for 50% less collects the heat than the standard Memory foam.

APOLON

Thickness 30 cm

- 1 → HR foam - extra firm hardness
- 2 → T-3550 foam
- 3 → HR foam - medium hardness
- 4 → Memo cool foam
- 5 → Mattress ticking Tricover
- 6 → Removable cover with zipper:
- DREAMSOFSEAN canvas
- Koflin 400g/m²
- Retex 17g/m²

Mattress that has a Memo cool foam as a gel that regulates the temperature during sleep. The foam itself has a "memory shape" effect, which guarantees exceptional comfort.

Memo cool foam is the new technology of our company, which for 50% less collects the heat than the standard Memory foam. In the lower part of the mattress there are 2 layers of the highest quality HR foam (HR35 and HR37) and EL35 foam layer, in order to better support the spinal column.

Cashmere canvas, which has anti-bacterial and anti-allergic properties, will also provide additional comfort, it is pleasant to touch, washable at 40°.

Designed for weighing over 130kg.

NATURAL

Thickness 22 cm

- 1 → Memory foam, both sides
- 2 → Coconut plate 1300g, both sides
- 3 → Sky cell foam
- 4 → Mattress ticking Tricover
- 5 → Removable cover with zipper:
- Garden canvas
- Koflin 400g/m²
- Retex 17g/m²

It is recommended for people who lead an active life.

The mattress is specially designed to create conditions for comfortable sleep. The elastic level gives the mattress the participation of Memory foam, which is shaped towards your body and providing elastic support to the spine, while the Sky cell foam in the middle of the mattress gives support. It helps to relieve muscle from tension and improve morning well-being. Natural coconut fibers perfectly pass the air, allowing the skin to breathe.

The mattress contains an overhead, which serves as protection when removing the wash cover due to washing.

The cover is made from the canvas cloth, filled with koflin of increased density, washable at 40°.

The mattress is designed for weighing over 130 kg.

BEST MEMORY H3

Thickness 24 cm

- 1 → HR foam - extra firm hardness
- 2 → HR foam - medium hardness
- 3 → Memory foam
- 4 → Mattress ticking Tricover
- 5 → Removable cover with zipper:
- Tencel canvas
- Koflin 480g/m²
- Retex 17g/m²

A great choice of mattresses for active and energetic people.

The mattress is made of the finest high-elastic foam, which are made up of open cells that allow air flow, making the sleeping area fresher and cleaner.

On the surface is a layer of Memory foam, which adapts to your body and your movement. HR foam is characterized by exceptional orthopedic properties and is suitable for people with increased weight.

The mattress cover is made of Tencel canvas, which has 50% more capacity to absorb moisture than cotton. It has a silky appearance, pleasant to touch, it does not crowd and prevents the appearance of mites and bacteria, it is recommended for people who have sensitive skin.

The mattress is designed for up to 130kg weight.

EXCLUSIV PLUS

Thickness 23 cm

- 1 → Sky cell foam
- 2 → HR foam - medium hardness
- 2 → Mattress ticking Tricover
- 4 → 3D flange
- 5 → Removable cover with zipper:
- POLUX BEKAERT canvas
- Koflin 400g/m²
- Retex 17g/m²

The mattress is made of a combination of two types of foam, on the one hand it is a soft Sky Cell foam 3236, and on the other HR foam 3040 with medium hardness. You can choose the side where you will sleep.

The cover is designed with additional sideburns on the sides as a 3D net, which allows the mattress to breathe and creates a healthy climate during sleep, the cover has antibacterial properties, washable at 40°.

Designed to weigh over 130kg.

SPA

Thickness 24 cm

- 1 → HR foam - medium hardness
- 2 → Profiled Sky cell foam
- 3 → Memory foam
- 4 → Mattress ticking Tricover
- 5 → Removable cover with zipper:
- Buhani canvas
- Koflin 400g/m²
- Retex 17g/m²

A mattress designed specifically for those who are not sure whether they like a hard or soft side to sleep, so they can rotate it.

It is made of our best quality foam, the profiled Sky Cell foam in the central part, on the one hand is a Memory foam that is shaped and adapted to the body in warmth, which is a softer side, and on the other hand, the harder HR foam with high elasticity, which is made up of open cells that allow for an uninterrupted flow of air and make the surface fresher and cleaner.

The cover is stitched with a higher density koflin and a retex, which creates additional comfort for the mattress. It has antibacterial and antiallergic properties, washable at 40°.

The mattress is designed for up to 130kg weight.

MAXI

Thickness 20 cm

- 1 → Profiled Sky cell foam
- 2 → Memory foam
- 3 → Mattress ticking Tricover
- 4 → Removable cover with zipper:
- Stretch canvas 100% polyester, 170g/m²
- Koflin 400g/m²
- Spandbond 15g/m²

In order to achieve a high level of comfort, a combination of two types of foam, a profiled Sky Cell foam and a cutting board Memory foam were used in this mattress. The mattress base has special cuts that allow the flow of air. Foam with a "memory shape" provides complete support for the spine, maintaining high sleeping strength.

Suitable for people who like medium-hard mattresses.

Canvas is gently on the touch, stretched with a koflin of increased density that creates additional comfort for the mattress. It has antiallergic properties, washable at 40°.

Designed for weighing up to 90kg.

SKY

Thickness 20 cm

- 1 → Sky cell foam
- 2 → Sky cell high elastic foam
- 3 → Mattress ticking Tricover
- 4 → Removable cover with zipper:
 - Stretch canvas 100% polyester, 170g/m²
 - Koflin 150g/m²
 - Spandbond 15g/m²

A compact model of mattress, suitable almost for everyone. The base of the mattress is an elastic Sky Cell foam, which creates the optimum conditions for supporting the spine in the right position. The soft surface of the soft foam has a slight effect of micro massage on the body, improving the functioning of the circulation system.

The cover can be washed at 40°, has antibacterial and antiallergic properties.

The mattress is designed for up to 90kg weight.

ROLL UP

Thickness 16 cm

- 1 → Sky cell foam
- 2 → Non removable cover:
 - Maxima canvas
 - Peeling 1 cm
 - Koflin 150g/m²
 - Spandbond 15g/m²

This is how we pack the mattress

The mattress is made of elastic anatomical foam. A special thick foam structure allows it to withstand heavy loads and quickly restores its shape after sleep.

The cover is made of jacquard fabric, resistant to wear and friction, has antibacterial properties. Even after several years, the mattress retains its shape. It can be transported in a rolled state.

The mattress is designed for up to 90kg weight.

Thickness 22 cm

- 1 → Sky cell foam
- 2 → Memory foam
- 3 → Sky cell foam
- 4 → Sky cell foam
- 5 → Mattress ticking Tricover
- 6 → Removable cover with zipper:
- Stretch canvas HP elastica
- Koflin 400g/m²
- Retex 15g/m²

The mattress is designed from three types of high-quality foams, it belongs to a medium hard mattress.

This mattress composition guarantees maximum comfort, because Memory foam is amortized between hard foam.

The cover contains elastin, it is pleasant to touch. Increased density of koflin gives added comfort and softness. The cover is antiallergic and antibacterial, washable at 40°.

The mattress is designed for up to 130kg weight.

BASE/BASE PLUS

Thickness 16/20 cm

- 1 → Sky cell foam
- 2 → Non removable cover:
- Cvilich canvas 70,9% polyester,
29,1% polypropylene
- Peeling 1 cm
- Koflin 150g/m²
- Spandbond 15g/m²

We recommend it to the younger population.

The mattress Base has a height of 16cm, and the Base Plus mattress is 20cm high. Sky cell foam creates optimum conditions for supporting the spine in the right position.

Non removable covers have antiallergic and antibacterial properties and with excellent ventilation the mattress core always remains clean and fresh.

The mattress is designed for a weight from 40 to 90kg.

SPRING POCKET CORE MATTRESSES

The comfort that you deserve and the support that we desperately need.

Mattresses with a core of elastic pocket springs will release you from pressure and alleviate muscle tension in the back. Following the latest world achievements for our customers, we also provide for you mattresses with 7-zone pocket core.

Using this mattress, you will see that every part of your body during sleep have adequate support and assistance.

AFRODITA

Thickness 28 cm

- 1 → Elastic spring pocket core 7-ZONE
- 2 → HR foam – medium hardness, both sides
- 3 → Lateral reinforcement of Sky cell foam
- 4 → Felt 800g, both sides
- 5 → Non removable cover:
 - Tencel canvas
 - Koflin 400g/m²
 - Retex 17g/m²

The mattress is made of a 7-zone pocket core, where independent springs provide the proper spine and during the sleep allows you to enjoy a nice dream.

Perfect for people who prefer medium-hard mattresses. The felt gives to mattress mild toughness, as well as lateral reinforcements. The HR elasticity foam layer gives the elasticity to the mattress, which enables the relaxation of the muscles.

The cover is made of Tencel canvas which has 50% more possibilities to absorb moisture in relation to cotton. It has a silky appearance, pleasant to touch, it does not crowd, prevents the appearance of mites and bacteria, it is recommended for people who have sensitive skin.

The mattress is designed for up to 130kg weight.

GREEN PLUS

Thickness 26 cm

- 1 → Elastic spring pocket core 7-ZONE
- 2 → Memory foam
- 3 → Sky cell foam, both sides
- 4 → Lateral reinforcement of Sky cell foam
- 5 → Coconut plate 1300g, both sides
- 6 → Felt 800g, both sides
- 7 → Mattress ticking Tricover
- 8 → Removable cover with zipper:
 - Aloe Vera canvas, 100% PES
 - Koflin 150g/m²
 - Retex 17g/m²

The mattress is made of a 7-zone pocket core with independent springs, which adjust to each of your movements, but does not interfere with the other half during your movements.

In addition to the felt, which provides additional strength, there is also an additional reinforcement from the coconut board, which deprecates the load. The lateral reinforcements of the raised density further reinforce it. Over all layers, the hard foam layer is reinforced with density, and on the one hand, the addition of Memory foam, which provides additional comfort.

Fabric green Aloya is gentle on the touch, stitched with koflin and retex, washable at 40°.

This model of mattress is also recommended for hotels. The mattress is designed for weighing over 130kg.

DIANA

Thickness 24 cm

- 1 → Elastic spring pocket core
- 2 → Sky cell foam, both sides
- 3 → Lateral reinforcement of Sky cell foam
- 4 → Felt 800g, both sides
- 5 → Non removable cover:
 - Nehir canvas
 - Koflin 400g/m²
 - Retex 15g/m²

The mattress contains a pocket core with independent springs, which allow the correct position of the spine. It is specially designed for people who like the hard surface, which, besides the pocket core, includes felt and side reinforcements, as well as Sky Cell foam with increased hardness.

The Nehir fabric contains 63% of cotton and a smaller percentage of polyester, it is pleasant to touch, it does not stretch. Additional comfort makes a koflin with increased density.

Maintenance of the cover is done by means of cleaning the fabric according to the instructions.

The mattress is designed for up to 130kg weight.

WIRE SPRING CORE MATTRESSES

For all of you that prefer traditional solutions, we offer mattresses with wire spring core. This composition will provide air circulation within the mattress.

Depending on the weight, springs will provide softer or harder base.

BONNELL
SPRINGS

FLEKS

Thickness 24 cm

- 1 → Bonnell spring pocket core with metal strips
- 2 → Sky cell foam, both sides
- 3 → Lateral reinforcement of Sky cell foam
- 4 → Coconut plate 1300g, both sides
- 5 → Non removable cover:
 - Damask canvas
 - Koflin 400g/m²
 - Retex 15g/m²

The comfortable model is built on the basis of dependent springs with additional flange reinforcement.

The insulation of the upper layer from the spring substrate provides a coconut board that amortizes the load and is characterized by increased wear resistance and mechanical stress.

The elastic foam supports the load and provides rest after a busy day, and the lateral reinforcements extend the durability of the mattress.

Damask canvas, shaped with koflin, forms a comfortable surface, has antibacterial and antiallergic properties. The mattress also has additional airflow and handles for easy manipulation.

The mattress is designed for up to 130kg weight.

It is made of microfiber cloth, stitched with koflin, has a rubber band at the ends to be able to attach it to an existing mattress.

Down blanket is washable at 40°.

PILLOWS

Sleeping on pillows designed to easy awakening and long-term vitality.

Hypoallergenic cover with woven Aloe Vera Extract stimulates the immune system and provides additional experience of freshness and relaxation.

How to properly choose a pillow ...

Height of the pillow. If you prefer to sleep on the side, the height of the pillow should match the width of your shoulders. To determine the width of your shoulder, using our lantern, it is necessary to measure the segment from the point of the lower part to the shoulder point.

The expert's recommendation is to sleep on the left. The lymphatic system plays a key role in the removal of "waste" and toxins from our system. Experts say most of the lymphatic system is located on our left side of the body, and sleeping on that side can help the body to process waste efficiently. Since the lymphatic system transports fat, proteins and other important substances to your tissue, lying on the left side allows your cells to get these substances faster.

The left side of the heart receives blood from the lungs and pumps it into your body. That's why sleeping on the left side can help your heart to do your job better and more easily. When sleeping on the left side, gravity improves the function of your bloodstream.

• For people who like to sleep on the side are suitable pillows of height of 10-14 cm - our recommendation in this case is Memriosoan or Memo cool Classic, because these types of pillows will properly support the head and neck.

• For people who sleep on the abdomen, pillows of at least height are suitable - our recommendation is the pillow Memo cool Contour.

• For people who prefer to sleep on their back, pillows of 10-13cm are recommended - the pillow should be medium hardness and mostly Classic pillows.

• For silicone-filled cushions, the recommendation is to change to 6 months, as they can form allergens and pathogens.

• If the mattress is soft, then the pillow should be lower than when sleeping on a hard mattress.

MEMO COOL CLASSIC

①→ Shaped Memo cool foam

②→ Removable cover:

- HP elastica canvas with 3D net

Pillow dimensions: - 60 x 39 x 13 cm

- 60 x 39 x 11 cm

- 60 x 39 x 9 cm

The pillow of Memo cool foam, which cools, increases the lifespan of the product. Memo cool foam for 50% less collects heat than standard Memory foam, has good air permeability, keeps the head and neck in the correct position, eliminates the appearance of microorganisms, while the 3D net supports intense air flow.

It is suitable for people sleeping on the back, on the side or on the abdomen.

The cover has antiallergic properties, washable at 40°.

MEMO COOL KONTUR

①→ Shaped Memo cool foam

②→ Removable cover:

- Frotir canvas

Pillow dimensions: 60 x 40 x 12 cm

The pillow of Memo cool foam, which cools, has excellent air permeability, is designed for people who sleep on the abdomen.

The cover is made of frotir, which has antiallergic properties, greatly absorbs moisture, reduces the growth and development of bacteria and mites.

The pillow is not only soft, but also flexible, so that the head does not "sink" during sleep.

The cover is washable at 40°, and the pillow core should only be ventilated.

MEMORISAN

①→ Shaped Memory foam

②→ Removable cover:

- Stretch canvas 100% polyester, 230g/m²
- 3D net

Pillow dimensions: - 31 x 46 cm

- 40 x 50 cm

To make sleeping as comfortable as possible and to provide optimum support for the head and neck, an anatomical pillow is designed to provide it. The pillow with the effect of "memory shape" gently adjusts to the individual characteristics of the body.

3D net from the sides allow constant airing of the pillows.

The cover has antiallergic properties, washable at 40°, and the pillow core should only be ventilated.

KONTUR M/HR

①→ Shaped Memory foam

②→ Shaped HR foam

③→ Removable cover:

- Polux canvas with 3D net

Pillow dimensions: - 31 x 46 cm

- 40 x 50 cm

The pillow consists of two types of foam, on the one hand, a foam with profiling, and on the other HR foam that makes excellent support. This carefully selected combination perfectly monitors the contours of the body, the pressure on the head and neck practically is not present, and also creates a complete environment for healthy sleep and quick recovery.

3D net from the sides allow constant airing of the pillows.

The cover has antiallergic properties, washable at 40°, and the pillow core should only be ventilated.

KONTUR M/S

①→ Shaped Memory foam

②→ Shaped Sky cell foam

③→ Removable cover:

- Polux canvas with 3D net

Pillow dimensions: - 31 x 46 cm

- 40 x 50 cm

The pillow consists of two types of foam, on the one hand, a foam with profiling, and on the other Sky Cell foam that makes excellent support. This carefully selected combination perfectly monitors the contours of the body, the pressure on the head and neck practically is not present, and also creates a complete environment for healthy sleep and quick recovery.

3D net from the sides allow constant airing of the pillows.

The cover has antiallergic properties, washable at 40°, and the pillow core should only be ventilated.

IQ SLEEP

①→ Silicon balls

②→ Non removable cover:

- canvas HP elastica / mikrofiber

Pillow dimensions: - 50 x 70 cm

- 60 x 80 cm

The HP elastica fabric in the shape of a massager gently massages the head, and the silicone balls evenly distributed inside the pillow provide a pleasant elasticity. The other half of the cover is a microfiber fabric that breathes and ensures quality sleep even during the hottest or coolest nights.

Fabrics possess antibacterial properties and do not allow the development of bacteria and mites.

The pillow is washable at 40°.

SWEET DREAM

①→ Milled Memory foam

②→ Milled Sky cell foam

③→ Non removable cover:

- canvas cotton 100%, with koflin i retex

Pillow dimensions: - 40 x 60 cm

- 50 x 70 cm

- 60 x 80 cm

A soft and comfortable pillow will create the most comfortable sleeping conditions. The milled standard foam and milled Memory foam, evenly distributed inside the pillow, provide a pleasant elasticity. The cover contains natural cotton, which allows the flow of air and allows the skin to "breathe".

The fabric has antibacterial properties and therefore does not allow the development of bacteria and mites.

The pillow is washable at 40°.

SOFTY

①→ Silicon balls

②→ Non removable cover:

- canvas cotton 100%, with koflin i retex

Pillow dimensions: - 40 x 60 cm

- 50 x 70 cm

- 60 x 80 cm

Perfect choice of pillows for people who prefer to sleep on the side. This pillow is an excellent example of the best combination of affordable price and high quality. It is stuffed with silicone balls that provide a pleasant sleep. The pillow is pleasant to the touch and creates the most comfortable sleeping conditions and everyday recovery.

The cover is 100% cotton, has antiallergic properties.

The pillow is washable at 40°.

FAMILY

- ①→ Milled Memory foam
 - ②→ Milled Sky cell foam
 - ③→ Non removable cover:
 - Microfiber canvas, with koflin
- Pillow dimensions: - 40 x 60 cm
- 50 x 70 cm
- 60 x 80 cm

A soft and comfortable pillow for the whole family will create the most comfortable sleeping conditions. The combination of foam, evenly distributed inside the pillow, provides a pleasant elasticity. The pillow cover contains a microfiber, which allows the air flow and allows the skin to "breathe".

The fabric has antibacterial properties and therefore does not allow the development of bacteria and mites.

The pillow is washable at 40°.

AIR

- ①→ Silicon balls
 - ②→ Removable cover:
 - Microfiber canvas, with koflin
 - 3D net
- Pillow dimensions: - 40 x 60 cm
- 50 x 70 cm
- 60 x 80 cm

The pillow is filled with silicone balls, evenly distributed inside the pillow. The cover is a microfiber, antibacterial and pleasant to the touch.

3D net allows constant air flow.

The cover is removable and in case your pillow is too high you can adjust the height of the pillow by removing a certain amount of silicone balls.

The pillow is washable at 40°.

ECO

- ①→ Silicon balls
 - ②→ Non removable cover:
 - Microfiber canvas
- Pillow dimensions: - 40 x 60 cm
- 50 x 70 cm
- 60 x 80 cm

A soft and comfortable pillow will create the most comfortable sleeping conditions. Silicone balls, evenly distributed inside the pillow, provide a pleasant elasticity. The pillow cover is made of microfiber cloth, which allows air flow and allows the skin to "breathe".

Canvas is examined in accredited labs and has antiallergic properties.

The pillow is washable at 40°.

HOLANDIJA

- ①→ Milled Memory foam
- ②→ Milled Sky cell foam
- ③→ Non removable cover:
 - canvas cotton 100%, with koflin

Pillow dimensions: 50 x 70 cm

It is recommended for people who like to change position and sleep on the side or on the back, because it can be adapted nicely, you can form it as you like and how comfortable it is for you.

The pillow is filled with a combination of Memory foam and standard milled foam, evenly distributed in the additional memory peeling cover, which provides extra comfort and a better sleep.

Canvas is examined in accredited labs and has antiallergic properties.

The pillow is washable at 40°.

BLANKET

- ①→ Microfiber canvas, with koflin and retex

Blanket dimensions:

- 140 x 200 cm
- 160 x 200 cm
- 180 x 200 cm
- 200 x 200 cm

MEMO COOL FOAM

The material has an excellent property that collects less heat than the ordinary mattress with memory foam. Memo cool has a unique structure that is essential for healthy sleep, combines the unique anatomical support and comfort such as "Seventh Heaven".

Memo cool suits for all ages, the body gives orthopedic support and helps preserve health. The top layer of the mattress where the cool memo has a cooling effect, reducing the burden on muscles and helps relaxation, does not work any pressure on the body.

MEMORY FOAM

A material that was devised in the laboratories of NASA in order to provide maximum comfort and protection during space flights. The special features of memory foam allow it to adapt ideally to the body when resting. When you get up, memory foam returns to its former shape.

Commercial use of this remarkable material has started thirty years ago, when it became the symbol of a very healthy and relaxing sleep.

7-ZONE CORE

Pocket spring core is for people that demand high level of comfort and anatomical support. Mattresses with such structure are suitable for people with sensitive spine, as well as people that mostly sleep on side.

With 7-ZONE core, softest spots of mattress are the ones that are under our shoulders and hips, so spine is in natural position.

HR (High Resilience) FOAM

A material offering an exceptional balance between firmness and adaptability – the ideal support for the body for the perfect rest. It gives slowly as you lie down and gently lifts you when you get up. A unique experience in sleeping comfort.

POCKET SPRINGS

A technology that allows the mattress to adapt to the body and to movements during sleep. The luxurious sense of relaxation is made all the greater by the feeling of freshness, made possible by the permeable materials used, which not only provide comfort, but cleanliness too, with no retention of smells or fumes.

TENCEL

Quality Tencel antibacterial fabric prevents the development of mites and microorganisms. Tencel is biodegradable, renewable and environmentally friendly textiles made from tiny threads of natural cellulose fibers. It is characterized by exceptional softness and silky.

It is very resistant, sturdy and durable, can be washed by hand and machine. It is characterized by great transparency and ability moisture absorption. It has a 50% greater capacity of absorption of moisture than cotton. Tencel even prevent the occurrence of mites and bacteria, therefore recommended for people with sensitive skin.

SKY CELL

Using unique technological solutions from BAYER we have produced a range of open-cell polyurethane foams – SKY CELL.

It allows fresh air to continually circulate through the foam. Fumes do not collect in the foam, and microorganisms, dust mites and mould are unable to develop.

ECO LATEX

An exceptional material with improved characteristics as compared to natural latex. It has been proven to accumulate as much as three times less dust after long-term use than other materials used in mattresses.

These exclusive properties are improved perforations that accelerates the flow of fresh air.

BONNELL COILS

This tried-and-true traditional technology allows for excellent ergonomic characteristics and the support the body needs for quality rest. Extra-firm mattresses are recommended for people of greater body weight, making it easier to rise and preventing spinal problems.

COVERINGS

COVERINGS are made of materials with special characteristics. You can select the cover with silver threads woven in, which accelerate relaxation of the whole body, or with extract of Aloe Vera, which boosts the immune system.

FACULTY OF FORESTRY- BELGRADE

Faculty of Forestry of University of Belgrade, at the request of the company Vapeks doo, control the quality of each mattress produced under the brand S Dream. This establishes that all materials used by us are not harmful to human health does not work any pressure on the body.

CertiPUR

Independent laboratory that uses randomly chooses sample of sponge or foam (which can later be found in the final product), determines the level of damage to human health.

Certificate is primarily intended for European manufacturers of foam.

OEKOTEX 100 CERTIFICATE

All fabrics are produced in specialized factories in Belgium and Italy, and have the prestigious European certification Oeko-Tex® 100 - proof of regular check safety materials.

TÜV RHEINLAND

This certificate confirms that the content of substances in our foam is acceptable and not harmful to the human health.

swerea|IVF

In this lab, we tested the loss of hardness of foam, during use.

We also tested whether the foam loses its thickness due to the use. All analyzes have shown that our foam retain the characteristics of which are produced.
